

## PRACTICE MODE

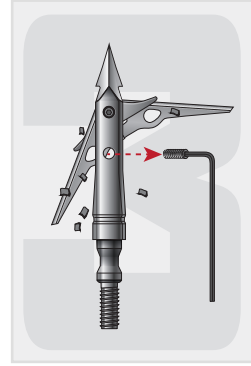

**IMPORTANT:** Practice mode screw must be removed before hunting. Broadhead blades will not deploy unless practice screw is removed.

Install practice mode screw.  
Remove O-ring.

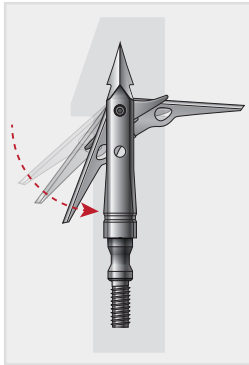

Ready for practice.

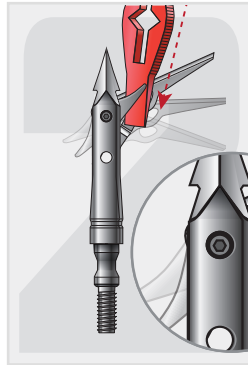

To return to hunting mode,  
remove practice mode screw,  
inspect the blades for damage,  
and remove any target debris.

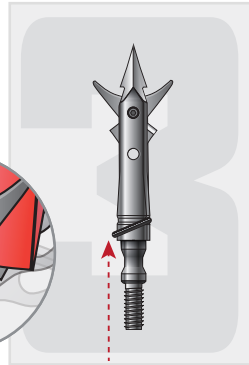

## CLOSING BLADES

Pivot a blade into ferrule.

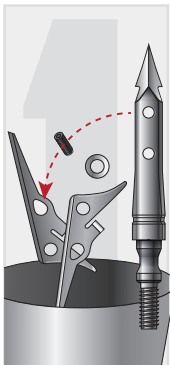

Insert wedge tool between blade  
and deployment arm (as shown).  
Return exposed blade into ferrule.

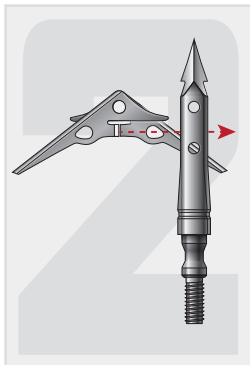

Install O-ring into groove.

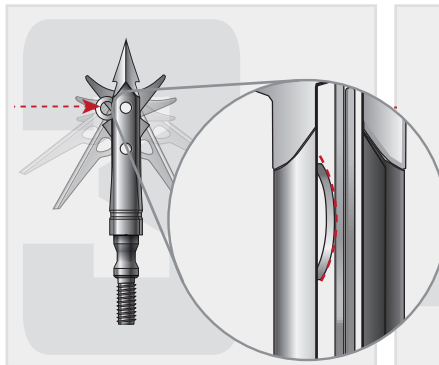

## REPLACING BLADES

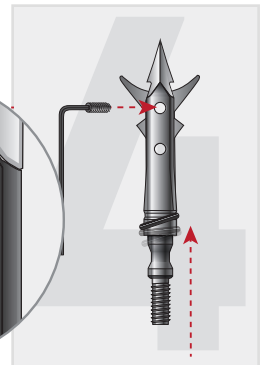

Remove and discard  
pivot screw, blades  
and wave washer.

Overlap **NEW left blade over  
right blade** in the opened and  
locked position. Slide blades into  
ferrule slot.

Rotate blades into the closed position.  
Install wave washer into ferrule as shown.  
Washer must be positioned between  
ferrule and blade.\*

Install **NEW** screw into pivot hole.  
Install O-ring into groove.

*\*Tip: Hex wrench can be inserted into pivot-screw hole to center all parts.*
